INTRODUCTION

Discover Delicious Recipes at BON APPÉTIT

BON APPÉTIT is your go-to destination for easy, delicious, and inspiring recipes. Whether you're a beginner or a seasoned cook, our collection offers something for everyone—from quick meals and healthy options to indulgent treats and traditional favorites. With step-by-step instructions, helpful cooking tips, and stunning visuals, we make it simple to create unforgettable meals. Explore, cook, and share the joy of great food with us! 🍴

WORKING

The HTML code constructs a recipe website focusing on cuisines, blending general introductory information with specific dish details. Usage of Bootstrap 5 CSS and JavaScript is done for styling. The `<body>` starts displaying the website title "Bon Appétit" with a logo.

The left column, using Bootstrap's class, displays the heading "Continental Recipes" and descriptive text about recipes, followed by an ordered list of cuisine links (Gujarati, Thai, American, Punjabi, Chinese). Each cuisine link points to a separate HTML page.

The inline CSS styles control the visual appearance of the page, including colors, fonts and layout.

FUTURE SCOPE

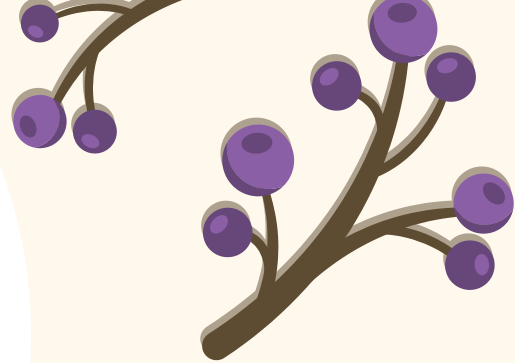

USER EXPERIENCE:

- Implement user registration and login
- Allow users to save favorite recipes, create personal cookbooks, and add notes.
- Add filters for dietary restrictions

BACKEND DEVELOPMENT:

- Learn and implement a backend language like Python, PHP, etc
- Integrate a database like MySQL, MongoDB etc

THANK YOU !
